Ljubiša Stevanović

FRONTEND DEVELOPER

WORK EXPERIENCE

Frontend developer / Elephant Solutions

JUNE 2021 - Present / Full-time

- **Qradar** - Worked as lone developer on implementing IBMs Qradar tool for Threat detection and response. My focus was on constructing multiple user interfaces using Angular and Angular Material.

  Additionally, My assignment was to implement REST APIs, Authentication and authorization processes using Axios.

- **Couturelabs** - Working in a team on a Magento 2 project we took over from another company, where our main task was to improve overall performance of the store. Since Magento is a technology I've never worker with I had to adapt and learn quickly in order to meet clients requirements.

Frontend developer / Spirit21 Gmbh

JAN 2022 - SEP 2023 / Full-time

- **LARA PWA App** - Building from scratch PWA app with offline funtionalities for recording and administrating assets. My primary role focused on implementing Features and UI on the frontend using React.js, Bootstrap.

  My key assingments were to implement authentication and authorization processes as well as Integrating APIs using Axios and Redux.

Frontend developer / MMS Group

NOV 2020 - APR 2021 / Full-time

Crafting landing pages for diverse products utilizing HTML, CSS, and JavaScript.
Ensuring the upkeep of an existing Web Shop.
Producing promotional assets for an eCommerce enterprise, encompassing social media advertisements.

Frontend Developer / Clickr Studio

JULY 2020 - Present

I collaborate with a diverse clientele, both locally and internationally, to craft bespoke digital solutions. This collaborative effort within my team involves the creation of websites, applications, and other tailored digital assets, all geared towards enhancing and optimizing their business ventures.
